

# CUSTOMER SUCCESS STORY

## Engineering software vendors

### Engineering software vendors in Korea

#### Challenge:

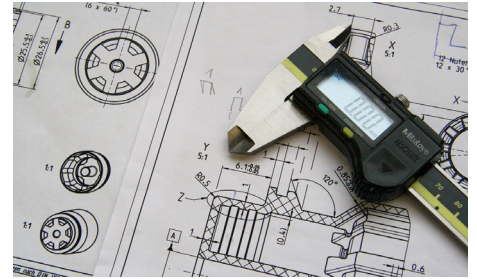

The organization was concerned about periodic regulatory audits by administration and needed to establish a personal data management framework.

#### Result:

The organization is now known for best-practice in personal data management.

#### Privacy-i Critical success factors:

1. Discover and classify personal data files from employees' PCs on monthly basis.
2. Employees take action to remediate(encryption, removal) discovered personal data files.
3. Files that are not remediated can be encrypted/removed by central policy set by Privacy-i console.
